the technological interoperability of digital libraries must be rethought in order to
adapt to new uses and networks informative digital environments aimed at responding
to heritage cultural scientific or commercial demands have taken over the global
cyberspace and have redesigned the techno informative landscape of the however while
the technological models demonstrate their effectiveness and explain to a large
extent the creation of digital libraries archives and deposits the variety of uses continues to cause debate the information technologies used in these digital libraries enable a technical interoperability of content this is not enough
to allow the adhesion of a public connected to very different information profiles
and techniques this book explores the avenues of a user orientated interoperability
enhancing access to information designing catalogs for the 21st century monograph

and cassettes

Knowledge Organization and Classification in
International Information Retrieval 2013-05-13

this landmark annual review has provided nearly three decades of knowledge insight
and research on topics critical to nurses everywhere it critically examines the full
gamut of literature on key topics in nursing practice including nursing theory care
delivery nursing education and the professional aspects of nursing annual review of
nursing research has brought together internationally recognized experts in the
fields of nursing and continues to deliver the highest standards of content and
authoritative reviews of research for students researchers and clinicians past
volumes of arnr have addressed critical issues such as pediatric care geriatrics
alcohol abuse patient safety rural nursing tobacco use and more key topics in this
dition include review of research related to regulation review of global nursing
workforce issues state policy and research initiatives focused on improving nursing
workforce horizontal violence and bullying staffing methodology in nursing future of
the workforce

Agricultural Libraries Information Notes 1990

the image of the dusty undisturbed archive has been swept away in response to growing
interest across disciplines in the materials they house and the desire to find and
make meaning through an engagement with those materials archival studies scholars and
archivists are developing related theoretical frameworks and practices that recognize
that the archives are anything but static archival deposits are proliferating and the
architects practitioners and scholars engaged with them are scarcely able to keep
abreast of them archives archival theory and archival practice are on the move but
what of the archives that were once safely housed and have since been lost or are
under threat what of the urgency that underscores the appeals made on behalf of these
archives as scholars in this volume argue archives their materialization their
preservation and the research produced about them are moving in a different way they
are involved in an emotionally engaged and charged process one that acts equally upon
archival subjects and those engaged with them so too do archives at once represent
members of various communities and the fields of study drawn to them moving archives
grounds itself in the critical trajectory related to what sara ahmed calls affective
economies to offer fresh insights about the process of archiving and approaching
literary materials these economies are not necessarily determined by ethical impulses
although many scholars have called out for such impulses to underwrite current
archival practices rather they form the crucial affective contexts for the
legitimization of archival caches in the present moment and for futures

make maps and other cartographic materials more easily accessible and usable maps and related cartographic materials cataloging classification and bibliographic control is a format focused reference manual for catalogers that should occupy a prominent place on your reference shelf outside of standard cartographic cataloging tools the bibliographic treatment of all forms of cartographic materials has never been compiled into one useful source this book separately examines the treatment of all major cartographic format types and outlines the way each should be cataloged with maps and related cartographic materials cataloging classification and bibliographic control you will learn to catalog the major formats of cartographic materials including sheet maps early and contemporary atlases remote sensed images such as aerial photographs and satellite images globes geologic sections digital material items on cd rom although it is primarily aimed at the beginning maps cataloger maps and related cartographic materials cataloging classification and bibliographic control will also be very helpful to the experienced cataloger who has not yet attempted to catalog say maps on cd rom in each chapter the experience and expertise of an established map cataloger or map librarian is the main source of information giving you practical and up to date advice

Contemporary Issues in Management Research 2009

this book first published in 1991 examines the actual costs of operating an acquisitions department acquisitions and business librarians have written eight highly practical chapters that will allow you to see beyond the obvious materials budget to the hidden but often enormous internal expenditures involved in the daily operation of your acquisitions department these experts discuss the costs involved in pre order searching managing exceptions to the work flow implementing an integrated online system automating serials acquisitions supporting personnel interviewing and hiring training performance mistakes absenteeism staff development performing public relations extra services requested by faculty and patrons organizing payment operations and processing invoices each chapter in addition to identifying the costs illustrates what happens to make costs expand and proposes suggestions for controlling the costs

Transactions of the New York Academy of Sciences 1893

vols 1 include proceedings of the annual meeting of the american association of law libraries

Transactions of the New York Academy of Sciences 1893

soft law increasingly shapes and impacts the content of international law in multiple ways from being a first step in a norm making process to providing detailed rules and technical standards required for the interpretation and the implementation of treaties this is especially true in the area of human rights while relatively few human rights treaties have been adopted at the un level in the last two decades the number of declarations resolutions conclusions and principles has increased in some areas soft law has come to fill a void in the absence of treaty law and in other areas of normative force exceeding it with binding character international law has become a battleground for interpretative struggles
rights protection in the context of existing regimes despite these developments. Little attention has been paid to soft law within human rights legal scholarship. Building on a thorough analysis of relevant case studies, this volume systematically explores the roles of soft law in both established and emerging human rights regimes. The book argues that a better understanding of how soft law shapes and affects different branches of international human rights law not only provides a more dynamic picture of the current state of international human rights but also helps to unsettle and critically question certain political and doctrinal beliefs. Following introductory chapters that lay out the general conceptual framework, the book is divided into two parts. The first part focuses on cases that examine the role of soft law within human rights regimes where there are established hard law standards, its progressive and regressive effects, and the role that different actors play in the incubation process. The second part focuses on the role of soft law in emerging areas of international law where there is no substantial treaty codification of norms. These chapters examine the relationship between soft and hard law, the role of different actors in formulating new soft law, and the potential for eventual codification.
